Dear PUNEETH RAM P

We express to you our heartiest congratulations for successfully completing the 30-hour '**Police Hackathon**' organised by the Karnataka State Police and Hack2skill in the campus of IIIT Bangalore, having Microsoft and Intel as technology partners. The unique and innovative ideations which you submitted were greatly appreciated by the hackathon mentors and are actively being circulated among all the departments of the Karnataka State Police for assessment and utilization purposes.

You are therefore requested to provide us with the 'README' file of your prototype, including the **code execution instructions** for the same. This would be of great help to the Karnataka State Police, as they are looking forward to running and testing your prototype at some level. You can either send the file to us here, by reverting to this mail or by uploading it to your Police Hackathon - Submission Github Repository.

Looking forward to a favourable response.

Regards  
Team Hack2skill
